#### **DETAILED ACTION**

This office action follows a response filed on October 13, 2005. Claims 2-4, and 7 were amended. Claims 1 and 10 were canceled. Claims 2-9 are pending.

# Claim Objections

1. Claim 2 is objected to because of the following informalities: The phrase "or their quats," does not apply to preceding Markush elements, "vinyl caprolactam" and "2-[[(butylamino)carbonyl]oxy]ethyl acrylate." Appropriate correction is required.

## Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 2-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear from claim 2 whether monomers vinyl pyrrolidone, dimethylaminoethyl methacrylate, and/or dimethylaminopropyl methacrylamide are optionally part of the Markush group, or whether they are excluded from the Markush group. Since claims 3-9 depend from claim 2, they are subsumed under the rejection.

## Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 2-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Bair et al. (U.S. 5,789,488).

Bair *et al.* discloses polyvinyl alcohol polymer grafted with water soluble/dispersible monomers such as 2-methacryloyloxyethyl trimethylammonium chloride, dimethylaminoethyl methacrylate, dimethylaminopropyl methacrylamide (claim 1). The ratio of graft monomer to polymer is 95:5 to 5:95 (col. 3, line 2). Another embodiment of the invention is drawn to use of graft monomers such as (meth)acrylic acid, methyl (meth)acrylate, and hydroxyethyl (meth)acrylate (col. 3, lines 55 and 66). Graft polymers are prepared in aqueous medium, and grafting is intiated with ceric ammonium nitrate, although persulfates and peroxides may also be employed (col. 3, line 39).

6. Claims 2-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Jacquet *et al.* (U.S. 4,283,384).

Example 14 of Jacquet *et al.* illustrates the preparation of a 50:50 graft copolymer by grafting quaternized dimethylaminoethyl methacrylate onto polyvinyl alcohol. Example 30 described grafting of PVA with methyl methacrylate. The synthesis is carried out in water using ceric ammonium nitrate as the initiator. Polymers of the invention are used in cosmetic compositions, specifically hair care products (title, abstract, claims 4, 8, and 10).

ì

### Response to Arguments

7. The original rejection of claims over Bair et al. and Jacquet et al. remain in force in light of the unclear claim language (vide supra, paragraph 3). Since vinyl pyrrolidone, dimethylaminoethyl methacrylate, and/or dimethylaminopropyl methacrylamide appear to be part of the Markush group, even though they are optional, the disclosures of the prior art would appear to read on the claimed subject matter. Furthermore, Applicants have not traversed the fact that Bair et al. teaches use of graft monomers such as (meth)acrylic acid, methyl (meth)acrylate, and hydroxyethyl (meth)acrylate for PVA polymer. Jacquet et al. also teaches such an embodiment.

#### Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
